Use SB21 or Alternative Bill

Some lawmakers have proposed an alternative to SB21 that would seek to balance shareholder rights with the need to ensure companies want to come to Delaware. Do you think lawmakers should [push forward with SB21, or craft an alternative bill]?

Americans for Financial Reform and American Association for Justice

Online sample of 600 registered voters in Delaware from March 07 to March 14, 2025.

Margin of error: +/-4.6%.

YouGov Blue

This survey is based on 600 interviews conducted by YouGov and commissioned by Americans for Financial Reform and American Association for Justice on the internet of Delaware registered voters. Some questions withheld for future release. The sample was weighted according to gender, age, race/ethnicity, education, and Delaware state region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, as well as 2020 Presidential vote, 2022 midterm election turnout, and approximate 2024 Presidential vote based on available results. Respondents were selected from YouGov to be representative of registered voters. The weights range from 0.1 to 4.54 with a mean of 1 and a standard deviation of 0.58.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetting sample is approximately 4.6%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
